

WE WANT OUR AMERICAN JOBS BACK

Our American construction industry was once a great economy building machine. The Florida construction industry was a main contributor to that machine. It is now a main contributor to the people and countries of Mexico, Central and South America.

Hear me out, before you throw this flyer away. In South Florida, in the past five or six years, we've seen countless "legal" subcontracting businesses and suppliers closing shop (most of which, have been in business for decades). You would think it was because of lack of work. On the contrary, during those years, a lot of big custom winter homes have been, or are being built for *the one percenters of our country*, here in South Florida.

The problem is, the majority of this work is being performed by illegal, as well as "legal" immigrants, who are *being paid in "cash"*. If our local, state and national government agencies (or even the press), was to do their job and *track the money*, they would run into a lot of dead ends. In other words, checks for individuals, as well as small illegal businesses, are being cashed at beer stores or check cashing outlets and then the paper trail ends. *No social security, no medicare, no personal taxes, no unemployment payments, no workman's comp, etc. being paid in.* In some cases, these workers are working for as low as \$50 a day, cash. *How can legal companies and the average American construction worker compete?*

Please visit our website and help force our government to take action.

www.WeWantOurAmericanJobsBack.com

Our government is now trying to pass new immigration reform legislation, that would help many of the estimated 11 million illegal immigrants become American citizens. Are they really thinking this thing through?
